SKILLS

Golang, Node

PostgreSQL, MySQL, NoSQL

REST, gRPC, GraphQL

Docker, AWS, Terraform

Github, Actions, CI/CD

SCRUM, Kanban

Vault, RabbitMQ, SonarCloud

Gin, Nest, Express

EDUCATION

Information Technology

Instituto Tecnológico de Tlalnepantla

2005-2010

LANGUAGES

English

Spanish

PROFILE

Backend Software Engineer over 10 years of experience. I possess knowledge in languages such as Golang, Node. I'm passionate about problem-solving and committed to delivering high-quality solutions within tight deadlines.

WORK EXPERIENCE

Developer

Softtek   AUG 2023 - PRESENT

- Building microservices in Golang
- Refactoring of legacy features
- Analysis and design of lambda applications
- Responsible for deploying lambda functions
- Main programmer of backend projects

Golang Developer

Bunsan   May 2021 - May 2023

- Design, development, and delivery of complex services in Golang
- I maintained and improved legacy backend applications
- I coded microservices, API REST with high coverage
- Participating in code reviews
- Working in Linux's environment, Docker
- Collaborating with Agile methodologies, Unit testing, CI/CD
- Following best practices to ensure scalability, performance, and maintainability
- Creating end-to-end interactions with customers APIs

Backend Developer

Bedu   Nov 2019 - May 2021

- Design services and systems following design patters
- I developed microservices in Golang, Node
- Implementing high-quality solutions following best practices, SOLID
- Built authorization mechanics and libraries in Golang
- I used Terraform for deploying services in AWS
- Third-party API integrations
- Management repos, GitLab, code reviews
- Adding new modules in GraphQL with Nest
- Working with Mongo, PostgreSQL

WORK EXPERIENCE

Full Stack Developer

Cultura Colectiva   Nov 2019 - May 2021

- I developing new features in microservices using gRPC, improving the functionality and scalability of the system
- I built custom tools using Go, allowing rapid migration (data) between two services (Golang, Node APIs)
- Maintenance of legacy applications
- Helping other team with Vue.js features

Full Stack Developer

ClickBus   Jun 2017 - Oct 2018

- I specialized in Symfony framework, working MVC applications
- I built REST API
- I integrated APIs into Angular applications, including the development of PWAs
- Gateway payment integrations
- Refactoring cache features

Backend Developer

Pulpomatic   Aug 2016 - Jun 2017

- I focused on module development, DB migrations and deployments using Laravel framework
- I actively participated in stack definitions for the team
- Working with legacy applications
- API integrations with Vue, Angular

Backend Developer

Vinco Orbis   Jun 2012 - Feb 2016

- I built MVC applications with Symfony
- I developed REST with Node (Express and Sails)
- I collaborated with frontend components using Angular
- Database management using MySQL, Mongo
- I built chrome extensions with JavaScript
